Future computers

👍 Edit Delete

bY ..

Future computers promise to be even faster than today's computers and smaller than a deck of cards. Perhaps they will become the size of coins and offer "smart" or artificial intelligence features like expert intelligence, neural network pattern recognition features, or natural language capabilities.

Computer programming

by ..

Computer programming is the process of designing and building an executable computer program to accomplish a specific computing result or to perform a specific task.

👍 Edit Delete

Computer science

by ..

Computer science is the study of computers and computing as well as their theoretical and practical applications. Computer science applies the principles of mathematics, engineering, and logic to a plethora of functions, including algorithm formulation, software and hardware development, and artificial intelligence.
